

## FOR IMMEDIATE RELEASE

### Fido's Indoor Dog Park is Trained in Canine First Aid and CPR

May 1, 2011

FIDO First Aid and CPR Class instructor, Holly Phalen, spent three hours at Fido's Indoor Dog Park teaching the staff how to react in a pet emergency. FIDO First Aid teaches essential First Aid and CPR skills to dog care workers and owners. The interactive course taught Fido's how to recognize and treat common medical emergencies as well as trauma and environmental emergencies.

The employees at Fido's are empowered with the confidence to save your dog if something goes wrong while they are in their care. The class focused on preventing, predicting and preparing for an emergency. First aid skills taught included; triaging, bandaging and CPR on a life like dog mannequin.
