

FOR IMMEDIATE RELEASE

Sniff Dog Hotel is Trained in Canine First Aid and CPR

February 3, 2012

FIDO First Aid and CPR Class instructor, Holly Phalen, spent three hours at sniff Dog Hotel teaching the staff how to react in a pet emergency. FIDO First Aid teaches essential First Aid and CPR skills to dog care workers and owners. The interactive course taught sniff to recognize and treat common medical emergencies as well as trauma and environmental emergencies.

The employees at sniff are empowered with the confidence to save your dog if something goes wrong while they are in their care. The class focused on preventing, predicting and preparing for an emergency. First aid skills taught included; triaging, bandaging and CPR on a life like dog mannequin.
